

PROGRESS

Patient Reported Outcomes of Genital Reconstruction and Experiences of Surgical Satisfaction (PROGRESS) for phalloplasty and metoidioplasty is a trans-led, community-based, patient-oriented study about outcomes of phalloplasty and metoidioplasty that are important to our community.

**We are currently recruiting:
Trans, non-binary and Two-Spirit people
who have undergone phalloplasty or metoidioplasty,
from either Canada or the United States
for a 45–60-minute anonymous survey about your pre and
post surgical experiences**

Contact the following people for more information:
Leo Rutherford, primary researcher,
Public Health and Social Policy,
University of Victoria.
leorutherford@uvic.ca

Nathan Lachowsky, research supervisor, University of Victoria.
nlachowsky@uvic.ca

**You can find more information or take
the survey on our project's website,
progresscolab.net/survey**

This research is funded by the CIHR
Strategy for Patient-Oriented Research
